2141

DATE MAILED: 01/10/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>		<b>Applicant(s)</b>	
	10/074,730		RAMIG, RANDAL J.	
	<b>Examiner</b>		<b>Art Unit</b>	
	Chirag R. Patel		2141	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 10 November 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-11, 15-19, 24 and 27-29 is/are pending in the application.
- 4a) Of the above claim(s) 12-14, 20-23 and 25 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-11, 15-19, 24 and 26-29 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

***Response to Arguments***

Applicant's arguments with respect to claims 1-28 have been considered but are moot in view of the new ground(s) of rejection. Examiner notes that claims 12-14, 20-23, and 25 are cancelled by the applicant.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6-11, 17-19, 24 and 26-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Strentzsch et al. – hereinafter Strentzsch (US 6,256,671).

As per claims 1, 24, and 26, Strentzsch discloses in a requesting computer system that is network connectable to a network, the requesting computer system including a native host name resolver that is not capable of resolving a host name when the requesting computer system is connected to the network, a method for resolving a host name, comprising the following:

an act of assigning the requesting computer system as a name server for the

Art Unit: 2141

requesting computer system; (Col 5 line 54 – Col 6 line 10, Col 6 line 38-57; The gateway 250 may also include a DNS proxy 260; DNS proxy acts a “resolver” for DNS queries)

an act of at a native host name resolver of the requesting computer system requesting resolution of a host name by sending host name data in a first protocol to the requesting computer system by sending the host name data to the name server assigned for the requesting computer system, the host name data being compatible for resolution of the host name by a DNS server, the first protocol being incompatible for resolving host name data over a communication link connecting the requesting computer system to the network; (Col 5 lines 38-53; The gateway 250 then forwards the requests to the Internet, either directly or via an ISP, making any necessary conversions so that the requests conform to the proper protocol)

an act of monitoring a name resolution port of the requesting computer system for receiving the host name data in the first protocol from the requesting computer system; (Col 5 lines 38-53)

an act of rerouting the host name data in the first protocol to a replacement host name resolver in the requesting computer system; and (Col 6 lines 38-57)

an act of sending the host name data from the replacement host name resolver in the requesting computer system using a second protocol to a module for resolving the host name data, wherein the second protocol is compatible for resolving host name data over the communication link connecting the requesting computer system to the network and (Col 5 lines 38 – 53, Col 6 lines 38-57)

an act of receiving a resolved address at the native host name resolver of the requesting computer system corresponding to the host name data. (Col 6 lines 38-57; This referral process continues until either an IP address is received)

As per claim 6, Strentzsch discloses the method as recited in claim 1, wherein the act of monitoring a name resolution port of the requesting computer system for receiving the host name data in the first protocol comprises the following: an act of monitoring a name resolution port of the requesting computer system that is associated with an IP network. (Col 5 lines 38-53, Col 4 lines 28-35)

As per claim 7, Strentzsch discloses the method as recited in claim 6, wherein the act of monitoring a name resolution port of the requesting computer system that is associated with an IP network comprises the following: an act of monitoring port 53 of the requesting computer system. (Col 5 lines 38-53, Col 4 lines 28-35; Port 53 is inherent to the DNS system because it is the default DNS port.)

As per claim 8, Strentzsch discloses wherein the act of monitoring a name resolution port of the requesting computer system for receiving the host name data in a host name resolution protocol comprises the following: an act of monitoring a name resolution port for receiving host name data in a host name resolution protocol that is compatible with an IP network. (Col 5 lines 38-53, Col 4 lines 28-35)

As per claim 9, Strentzsch discloses wherein the act of monitoring a name resolution port for receiving the host name data in a host name resolution protocol that is compatible with an IP network comprises the following: act of monitoring a name resolution port for host name data contained in one or more UDP packets. (Col 4 lines 9-26; UDP is inherent to the TCP/IP protocol stack)

As per claim 10, Strentzsch discloses wherein the act of monitoring a name resolution port of the requesting computer system for receiving the host name data in the first protocol comprises the following: an act of a replacement host name resolver monitoring a name resolution port for receiving host name data sent from a native host name resolver. (Col 5 lines 38 – 53, Col 6 lines 38-57)

As per claim 11, Strentzsch discloses the method as recited in claim 1, wherein the act of monitoring a name resolution port of the requesting computer system for receiving the name data in the first protocol comprises the following: an act of a resolving computer system monitoring a name resolution port for receiving host name data sent from a native host name resolver. (Col 5 lines 38 – 53, Col 6 lines 38-57)

As per claim 17, Strentzsch discloses wherein the act of sending the host name data from the replacement host name resolver in the requesting computer system using a second protocol to a module for resolving the host name data comprises the following:

Art Unit: 2141

an act of the of a replacement host name resolver rerouting the host name data to a module that was identified by entering one or more parameters in a user interface; (Col 5 lines 38 – 53, Col 6 lines 38-57)

As per claim 18, Strentzsch discloses the method as recited in claim 1, further comprising: an act of providing the requesting computer system with a network address by resolving the host name data that was sent to the module. (Col 6 lines 38-57)

As per claim 19, Strentzsch discloses the method as recited in claim 18, wherein the act of providing the requesting computer system with a network address by resolving the host name data that was sent to the module comprises the following: providing the requesting computer system with a numerical IP address by resolving a domain name that was sent to the module. (Col 4 lines 27-35)

As per claim 27, Strentzsch discloses the method as recited claim 26, wherein the one or more computer-readable media include physical storage media. (Col 11 lines 38-59)

As per claim 28, Strentzsch disclose the method as recited claim 26, wherein the one or more computer-readable media include system memory. (Col 11 lines 38-59)

Art Unit: 2141

As per claim 29, Strentzsch disclose the method as recited in claim 1, wherein the requesting computer system is a physical device. (Col 5 line 54 – Col 6 line 10, Col 6 line 38-57; The gateway 250 may also include a DNS proxy 260)

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Strentzsch (US 6,256,671) in view of Aziz et al. – hereinafter Aziz (US 6,119,234).

As per claim 2, Strentzsch discloses the method as recited in claim 1. Strentzsch fails to disclose loopback address. Aziz discloses wherein the act of assigning the requesting computer system as a name server for the requesting computer system comprises the following: an act of utilizing a loop-back address to assign the requesting computer system as a name server for the requesting computer system. (Col 8 lines 26-42) At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to disclose a loopback address in the disclosure of Strentzsch. The motivation for doing so would have been to allow a configuration when it is not desirable or possible to modify a client's resolver. (Col 8 lines 26-42)

Art Unit: 2141

As per claim 3, Strentzsch / Aziz disclose the method as recited in claim 2.

Strentzsch fails to disclose the act of utilizing a defined IP loop-back address. Aziz discloses wherein the act of utilizing a loop-back address to assign the requesting computer system as a name server for the requesting computer system comprises the following: an act of utilizing a defined IP loop-back address to assign the requesting computer system as a name server for the requesting computer system. (Col 8 lines 6-18) At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to utilize a defined IP loop-back address in the disclosure of Strentzsch. The motivation for doing do would have been to allow the full resolver functionality to be implemented in one component. (Col 8 lines 19-25)

As per claim 4, Strentzsch / Aziz disclose the method as recited in claim 1.

Strentzsch fails to disclose the act of assigning the requesting computer system as the primary name server. Aziz discloses wherein the act of assigning the requesting computer system as a name server for the requesting computer system comprises the following: an act of assigning the requesting computer system as the primary name server for the requesting computer system. (Col 8 lines 26-42) At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to assign the requesting computer system as a primary name server. in the disclosure of Strentzsch. The motivation for doing do would have been to to allow the full resolver functionality to be implemented in one component. (Col 8 lines 19-25)

As per claim 5, Strentzsch / Aziz disclose the method as recited in claim 1. Strentzsch fails to disclose the act of assigning the requesting computer system as a DNS server. Aziz discloses wherein the act of assigning the requesting computer system as a name server for the requesting computer system comprises the following: an act of assigning the requesting computer system as a DNS server for the requesting computer system. (Col 8 lines 26-42) At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to assign the requesting computer system as a DNS server in the disclosure of Strentzsch. The motivation for doing so would have been to allow the full resolver functionality to be implemented in one component. (Col 8 lines 19-25)

As per claim 16, Strentzsch disclose the method as recited in claim 1. Strentzsch fails to disclose secure DNS. Aziz discloses wherein the first protocol is DNS and the second protocol is secure DNS. (Col 5 line 61 – Col 6 line 10) At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to disclose secure DNS in the disclosure of Strentzsch. The motivation for doing so would have been to authenticate the data in other resource records. (Col 5 line 61 – Col 6 line 10)

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2141

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Strentzsch (US 6,256,671) in view of Onweller (5,799,016).

As per claim 15, Strentzsch discloses the method as recited in claim 1. Strentzsch fails to disclose the first protocol is UDP and the second protocol is TCP. Onweller discloses wherein the first protocol is UDP and the second protocol is TCP. (Col 9 lines 39-62) At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to disclose the first protocol is UDP and the second protocol is TCP in the disclosure of Strentzsch. The motivation for doing so would have been to support communication with standard that use different standards. (Col 9 lines 39-62; capable of translating between the tcp/ip, udp/ip)

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references are disclosed in the Notices of References cited page and teach numerous methods for resolving host data name. A close review of these references is recommended.
